

CLAN ALPINE

Quick Facts:

Removed 100 on 10/23/06 - Emergency Fire Gather
Fire Damaged 6,200 Acres
Last Maintenance Gather: 2000
HMA Acreage: 298,649
AML: 612-979
Projected Remaining Population on Range: 549
Currently Subjected to Fertility Control-PZP
Strong Mountain Lion Population/Low Reproductive Rates

The following was reported by the administering Field Office

Reason for gather: Wildland fire
Total number of wild horses gathered: 92
Total number of wild horses removed: 88
Total number of wild horse deaths: 0
Total number of wild horses returned to range: 4 (old)
Total estimated number of wild horses currently on range: 460 would be the best estimate at this time
Total number of wild horses removed over 10 years of age: 11
Total number of mares removed: 54
Total number of studs removed: 19
Total number of foals <1yr old removed: 17
Estimated number of mares on range: Generally the percentage of males and females would be somewhere in the 45 to 55 percent range. This gather
Estimated number of Studs on range: does not reflect that range but it could be because these horses came from only a small portion of the HMA.
Total number of mares gathered that received fertility control: 0
